Optocore V221 Firmware	V5R3	V5R3

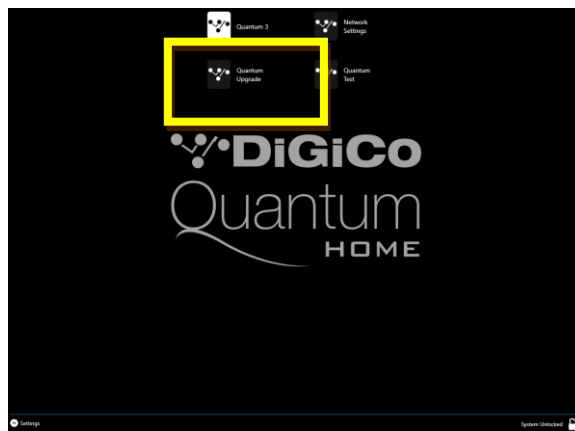

**Disconnect All Optocore, MADI, Local I/O Audio and
Headphone Connections before proceeding with this upgrade.**

Using the Master Screen System Menu, select Quit to Windows – this will open Quantum Home

1. Unzip and copy the Software Updater **Quantum3_V2025z_Updater.exe** onto a suitable USB Key and insert into a free USB Socket on the QUANTUM 3.
2. Click Settings (bottom left corner) and then File Browser. Navigate to your USB Key and run **Quantum3_V2025z_Updater.exe** from your USB Key. This updater will install the required updates, application software, and backup your current QUANTUM 3 application folder.

3. Once the installer is complete, In Quantum Home, click on "Quantum Upgrade".

For each device, you will see the current running version in the "running" column, with the new version in the "available" column. The available version is based on the corresponding file in D:\QUANTUM 3 directory. Now proceed with the console firmware updates by pressing the corresponding **update** button in the order specified below. If you are upgrading from V1926, you will need to update the following codes:

Engine Codes for Sharc 1 & 3 Worksurfaces (x4)

If you are upgrading from a version earlier than V1926, they may be additional updates to perform.

V2025 contains firmware updates for the following DMI Cards.

None

Once all upgrades are complete, please close **Quantum Upgrade**.

Click Settings (bottom left corner) and then Advanced Settings

If, after following all the instructions, you cannot upgrade your QUANTUM 3, please contact DiGiCo Support.
